DETAILED ACTION

Allowable Subject Matter

1. Claims 1-44 and 46-56 allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art teaches the invention essentially as claimed with a metal-organic complex but does not teach all the components of the particular instant metal-organic complex. See Mukherjee (USPN 5919587). Neither is there disclosure of the claimed organic formula used in combination with lanthanide materials particularly BaCeGd oxide or SrCeGd oxide, a quantitative growth rate, sintering or thermal formation at a temperature under 400 C in an inert atmosphere to force a particular film thickness. See also Spiewak et al. (USPN 6136412), Debe (USPN 6040077) and Marchetti et al. (USPN 5277996). Zhen teaches a doped LaMnO₃ formed from nitrates but heat treats at higher than 1380 C (1400 C).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
